

CYBERSECURITY INCIDENT RESPONSE ASSURANCE

Accume's Cybersecurity Incident Response Assurance is designed to provide layered support for organizations, both proactively and operationally. Proactively, Cybersecurity Incident Response Assurance provides an assessment to evaluate your organization's incident response readiness and is backed by regular threat intelligence briefings.

Operationally, our team is standing by to assist in the event you have an incident. With a solid foundation of IT security skills, certifications and in the trenches relevant experience, Accume's Cybersecurity SWAT team is standing by, on-call and available for your assistance.

Benefits of Accume's Incident Response Assurance include:

REDUCE LOSS

Minimize the duration and impact of a cyber-security breach

Reduce the time between incident discovery and remediation

Reduce the potential reputational impact of security incidents through proper response, containment, handling, communication and remediation of event

RAPID RESPONSE

Guarantee the availability of Incident Response security consultants during a crisis

Get immediate response from Incident Response experts when a security incident occurs

Have Accume SWAT team members onsite in as little as 48 hours

REDUCE COSTS

Eliminate costly delays due to procurement processes and required contract approvals

Potential reduction of cyber insurance premiums

Timely and measured response with minimal business disruption
Predictable rates for incident response work.

CYBERSECURITY INCIDENT RESPONSE ASSURANCE

Accume's Incident Response Assurance has three main components:

CYBER INCIDENT RESPONSE READINESS ASSESSMENT – The Cyber Incident Response Readiness Assessment is designed to evaluate the readiness of the organization to properly respond to cyber incidents. Accume SWAT team members will perform the following:

- Review incident response program details and policies currently at the organization
- Provide a gap analysis report and recommendations of additional or modified controls
- Create an incident response playbook
- Conduct a tabletop exercise with first-responders and management

THREAT INTELLIGENCE BRIEFINGS – Cyber threats are constantly changing and evolving, and it is essential that organizations are armed with the latest actionable information. The Accume SWAT team members are at the front line of current events, and they will provide actionable analysis of events and trends, through:

- Monthly Briefings
- Weekly overview of trends
- Watch list alerts
- Alert Management

CYBERSECURITY SWAT TEAM – Accume's SWAT team is ready when you need them for full incidents as well as shorter consultations. When you have an incident, you are assured to receive the following:

- Phone Response: Within 3 hours
- Remote investigative work: Within 24 hours
- Boots-on-ground: Within 48 hours
- Security Analytics
- Containment of incident
- Determination of root cause through forensics
- Final Incident Report
- Interaction with your Legal Team and Examiners as required by the institution
- Guidance on client notification(s) and content for completing required Suspicious Activity Reports (SAR) to the Financial Crimes Enforcement Network (FinCEN).

"It is not only about serving our clients and markets in their current needs with the highest quality, but also providing a perspective on the future and the capacity to help them get there."
